

Dining Room Coffee Station Planner

1 / Compare locations before moving equipment

My everyday drinks and the tools I actually use

Location A / furniture width x usable depth x height

Location B / furniture width x usable depth x height

Room check: chairs pulled out, doors open, household access needs

Appliance: model / closed footprint / open-lid and refill access

Furniture: load, finish, moisture/heat suitability and anchoring instructions

Resolve these checks before setting up

- ☐ Appropriate outlet and cord route; no walkway or pinching problem
- ☐ Surface, stability, edge position and appliance clearances confirmed
- ☐ If the fit is unsuitable, keep brewing in the kitchen

Make the Station Easy to Use

2 / Give every daily task a home

Clean mugs / coffee / tea / dry utensils will live here

Water refill route and a clear cup landing space

Used cups, grounds and damp tools return to the kitchen this way

Questions for the appliance or furniture manufacturer

My after-coffee reset

- ☐ Return chilled ingredients and used cups to the kitchen
- ☐ Handle hot parts and cleaning according to the appliance manual
- ☐ Clean suitable surfaces when safe; leave storage dry
- ☐ Return everyday pieces and preserve dining/table access

One adjustment to try after using the setup for ordinary meals

Planning aid only. Follow your exact appliance and furniture instructions.
