

Coffee Pod Storage Planner

Measure your own space. Start with a container you already have.

My pod system and varieties:

Daily use and easy-access supply:

Daily pods x days between refills = daily-section quantity

Usable space: inside width, depth, height and opening:

Organizer compatibility and outside / inside measurements:

Dry storage location and backup supply location:

Before you finish

- [] Drawer closes; pods are easy to grasp; seals stay protected.
- [] Appliance access, stable support and manual clearances checked.
- [] Varieties and dates remain identifiable; used pods stay separate.

Pod Stock & Refill Log

Keep product instructions and dates with your supply.

Variety / system	Quantity	Printed date	Storage spot

Reorder point and usual shopping / delivery lead time:

Example: 2 pods/day x 3 days to replace = 6 pods for that lead time.

My refill cue and next stock check:

Refill routine

- ☐ Check quantities. ☐ Use earlier appropriate dates first.
- ☐ Refill daily section. ☐ Return reserves to their dry storage spot.
- Follow each product label. This sheet does not set shelf life.
