

Mug Storage Fit & Reset Planner

Start with your cups, then check the actual storage opening.

1. Choose your mug groups

Everyday coffee / tea mugs and number needed:

Guest mugs and proposed home:

Seasonal / sentimental mugs and proposed home:

2. Measure the largest cup in each group

Record inches or centimeters consistently. Include the handle in the width.

Mug / group:

Width including handle:

Height:

Base width:

Space needed to lift and grip comfortably:

3. Measure your storage opening

Location:

Usable width:

Usable depth:

Clear height:

Hinges, frame, shelf legs or drawer obstructions:

Check actual fit with your mugs. Measurements do not establish load capacity.
Use the organizer and mug maker's instructions for suitability and care.

Mug Storage Fit & Reset Planner

Try a simple arrangement before buying another organizer.

4. Choose one idea to trial

Single shelf row / shelf insert / upright drawer / small daily tray

Purpose-made stackable mugs / suitable rack or hooks / separate guest storage

My first choice and why:

What I can reuse:

If buying: outside size, usable space and instructions checked:

5. Check access through an ordinary week

Mark each check when it works for everyone using the kitchen.

- ☐ A daily mug is easy to reach and put away.
- ☐ Handles have room; no cups catch or scrape.
- ☐ The drawer or cabinet closes without contact.
- ☐ Mugs and organizers sit securely and stay dry.
- ☐ Appliance access and preparation space stay clear.
- ☐ Guest and seasonal mugs have their own home.

6. Make one small adjustment

What needs changing:

Buy, reuse or keep the current setup? Why:

For racks/hooks, verify the exact surface, mounting direction and weight instructions.
