

Coffee Basket Fit Worksheet

Measure your own space. Use one unit throughout: inches or centimeters.

Location / basket job:

Units used:

Date:

Candidate / variant:

1. Clear opening - measure the narrowest usable space

Width:

Depth:

Height to lowest obstruction:

Hinges, shelf lips, door movement and other obstacles:

2. Basket - confirm maximum exterior AND usable interior

Outside width:

Depth:

Height incl. handles:

Inside base width:

Depth:

Usable height:

Handle projection / lid opening / stated size variation:

3. Supplies - measure the real group, including packaging

Contents and arrangement:

Grouped width / depth / height:

Try One Basket First

A paper footprint checks space. It does not test weight, stability or heat.

4. Mockup and arrival checklist

- ☐ Paper footprint fits without using appliance working space.
- ☐ Height and handles clear the opening and nearby obstacles.
- ☐ Base is fully supported; shelf and basket ratings are suitable.
- ☐ Real supplies fit the usable base without crushing packaging.
- ☐ I can grip, pull out and return the basket comfortably.
- ☐ Daily items are easy to see and retrieve.
- ☐ Loaded basket is manageable at its planned storage height.
- ☐ Basket is clear of heat, steam, vents and appliance cords.
- ☐ Care instructions suit the intended use and surface.

5. Decision and next steps

Keep / revise / return:

Questions for seller (internal sizes, handles, care, load):

What to change before buying more:
