

A festive corner that works

Christmas coffee station planner

Plan beside your actual counter before buying anything.

My palette and the items I already own

Appliance manual / model and required access

Clear space needed for opening, refilling and making drinks

One dry display spot away from heat, steam and water

One decoration in; one everyday item stored away

What I still need (if anything) and my spending limit

Before adding decor

Check the manual; keep lids, reservoirs and outlets accessible.

Try the normal drink-making routine with the proposed setup.

Choose fewer items if the counter feels crowded.

This worksheet is not an appliance-clearance diagram.

Keep December easy

Christmas coffee station planner

Daily reset

- ☐ Return ingredients to their proper storage.
- ☐ Wash cups and tools; follow appliance cleaning instructions.
- ☐ Lift the decor dish to clean the counter beneath it.
- ☐ Check that the display is dry and outside the brewing area.
- ☐ Switch off decorative lights before going out or going to bed.

After-Christmas storage location

Cleaning / drying / battery instructions to check

Pieces I want to use again next year

What I would simplify next time

Safety reminder

Keep decorations away from heat, water and appliance controls.

Keep small parts and batteries inaccessible to children.
